

Profile

I.M.C.A. Ltd is leader enterprise in the engineering industry with decades of experience. Owing to its strategic position close to the international hub of Civitavecchia, I.M.C.A. offers a wide range of services both at national and international levels.

Aside its business relations with the main italian firm ENEL Ltd, due to its proximity to the most important national power plants, I.M.C.A. has always committed itself to reaching relevant success in the global arena.

The company has managed to emerge nationally and internationally for its quality of products and the high levels of standard both coupled with its ability fulfill customer's request in accordance with tailor made projects.

Thanks to its longstanding experience and its independent productive capacity, I.M.C.A. is able to supply completed and suitable products to different industrial sectors.

What best characterizes our enterprise is the high level of professional skills. This is our most significant asset that allow us to be amongst the first in italian market.

So far, I.M.C.A. has approximately 100 employees that work as steel workers, welders, pipe fitters, crane operators and foremen. In addition, our skilled technical staff is able to report and supervise all the productive activities.

In 2001, I.M.C.A. has joined the Consortium ICC Ltd (Civitavecchia Associated Companies).

On the main important challenges the Consortium is facing is the boost of local SMEs helping them have an active role in projects and investments in the area of Civitavecchia and abroad.

Accordingly, I.M.C.A. has been the head-enterprise in the latest:

- Conversion of productive sectors n.1,2 and 3 of the thermal power plant "Torrevaldaliga Sud" into a combined cycle power plant;
- Conversion of "Enel Produzione" thermal plant to a coal-fired power station with a special remarks on environmental adaptation "Torrevaldaliga Nord".
